Target version:			

Description

the EMU FS ETR 300 Settebello is able to run without electric tracks ?!?! But it still does the sparks and have the electric engine sign. This was with the nightly R23440 (if it matter)

included is a screenshot of the FS ETR 300 running without catenary

History

i m sorry... i ve been too fast in writing that bugreport...

it seems that all electric engine from the 2 cc set are having this problem...

#2 - 2011-12-07 20:53 - romazoon

Ok i should have done that way before... my bad again :

I started a new game (with R23440) and just loaded the 2cc set r 754.... everything works fine

you can erase my report...anbd again, sorry.
