- Target version set to next

#2 - 2013-07-08 20:42 - Alberth

A testcase, it seems to work but whether it is the right solution is another matter

- Base language file

```
##grflangid 0x01
##plural 0
```

```
TEXT1: Unchanged base
TEXT2: Unchanged base
TEXT3: Unchanged base
TEXT4: Unchanged base
```

- Translation language file

```
##grflangid 0x1F
##plural 0
```

```
TEXT1: Unchanged base transl
TEXT2: Unchanged base transl
TEXT3: Unchanged base transl
TEXT4: Unchanged base transl
```

- Change TEXT3 and TEXT4 in the translation (s/Unchanged/Modified/ for example)

- Upload translation

```
##grflangid 0x1F
##plural 0
```

```
TEXT1: Unchanged base transl
TEXT2: Unchanged base transl modified them anyway
```

2019-05-21

TEXT3: Unchanged base transl

TEXT4: Unchanged base transl modified them anyway

The final upload wins here, which is bad for the changes made by the user, but not sure what other solution exists in this case.

#3 - 2013-07-09 17:24 - Alberth

- *File tst2_result.png added*

for completeness, the translation strings after all updates

#4 - 2013-07-09 17:44 - Alberth

- *Status changed from New to Closed*
