<b>Target version:</b>	
<b>Description</b>	
<p>Sorry, I know it's a known issue, but make is now really painfully slow.</p> <p>Could we remove the dependency check for make install? I see the issue for dependencies. How about:</p> <ul style="list-style-type: none"><li>- we ban the use of hg push</li><li>- instead we have a script that does three useful things<ul style="list-style-type: none"><li>- runs the dependency check</li><li>- builds the grf, stopping on errors</li><li>- hg push if the first two steps passed ok.</li></ul></li></ul> <p>cheers,</p> <p>Andy</p>
